

## How to install Skye for Business on your home computer

1. Select the link below to connect to Microsoft's website to download and install the Skype for Business Basic stand-alone client onto your personal computer or laptop.  
<https://support.microsoft.com/en-us/help/3139711/how-to-install-the-skype-for-business-basic-stand-alone-client>
2. Once you have connected to the website, scroll down to the preferred language, English (US).
3. Select the software link that corresponds to the operating system running on your computer. If you are not sure whether the operating system is 32-bit or 64-bit try the 64-bit version first. The software will inform you if you need to pick the other one

English (US)	<a href="#">Skype for Business stand-alone (32-bit)</a> <a href="#">Skype for Business stand-alone (64-bit)</a>
--------------	--

4. Click on the downloaded file, accept the default install options, and select "Close" when completed. If you receive a "User Account Control" pop-up select "Yes" (Depends on version of Windows)

5. Skype for Business should now be available on your start menu. Locate the application and click on it to open.

6. Use your WRA email address ([username@wrallp.com](mailto:username@wrallp.com)) and password to login. Click "Accept" to the license agreement if prompted.

# Accept the license agreement

Skype for Business Basic 2016 includes these apps:

This product also comes with Office Automatic Updates.
